RE: GHOST PRACTICE

A rapid increase in staff over the past eighteen months made it necessary for us to investigate accounting packages, in an effort to manage the practice more efficiently.

We required various reports to enable us to keep a finger on the pulse. Statistics, turn-around times, fees earned, new matters received, etc., were of paramount importance and staff were normally too busy to oblige when these figures were requested.

We spent quite a lot of time researching which packages were available and best suited to our needs.

As our Conveyancing Department was already using Ghost Convey developed by Korbitec and finding the package user friendly, it was decided to purchase the Ghost Practice package.

Training for the entire staff was comprehensive and arranged to suit us and enable us to run the practice whilst staff were being trained in small groups.

Two members of the Korbitec staff were on duty in our offices for the entire first month when we switched over to their Ghost Practice package.

They assisted us, using the new package, with the clean-up of at least 86% of our accounting errors from the old package which we were using. These errors were of huge concern for the Year-end Financial Audit.

We are convinced with all the required information easily accessible, we will be able to manage our practice more efficiently and effectively in future, as we will be able to view the various reports and establish exactly what is happening in all departments.

Yours faithfully
